

## Junk charts

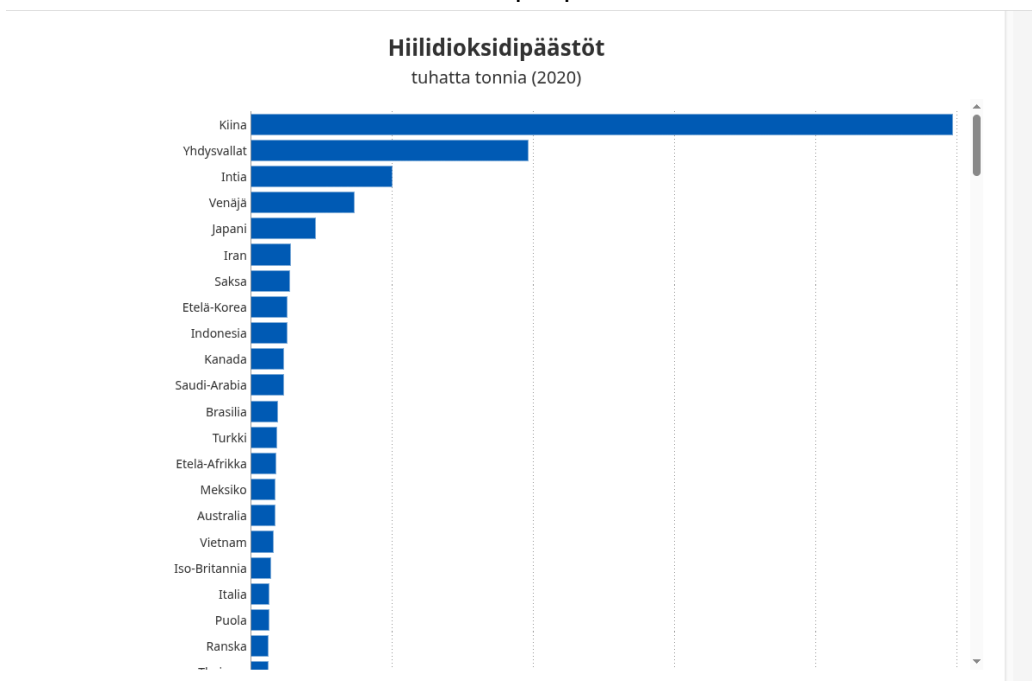

Kuvio 1. Lasten sijoittuminen tuloluokkiin vuosina 1995 ja 2019

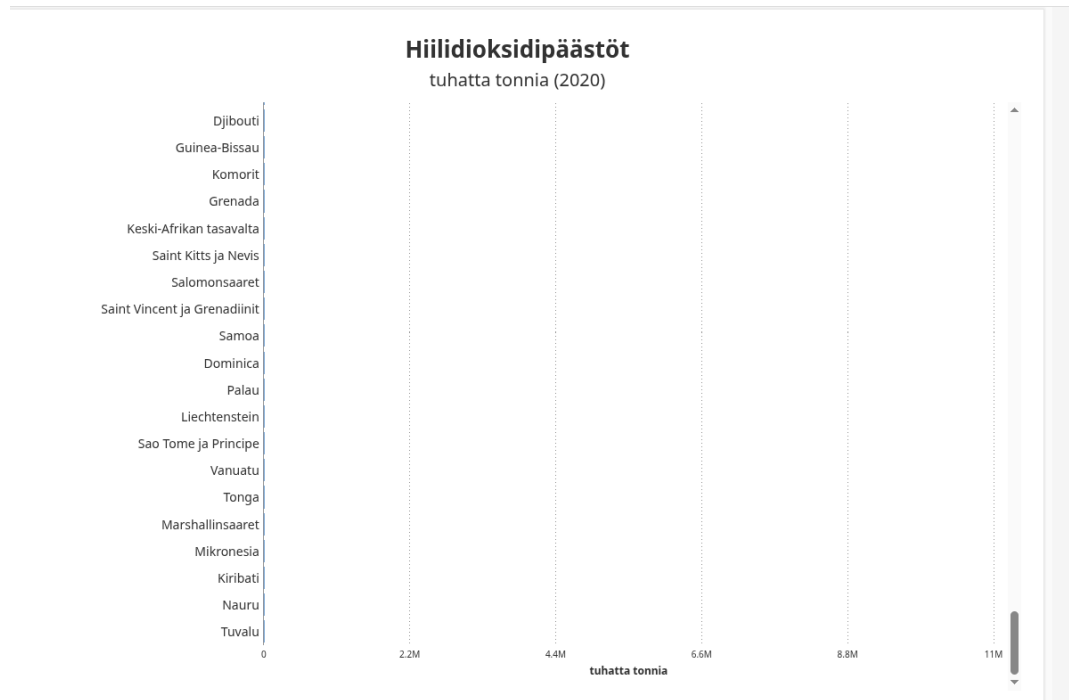

- Labeling problem. It is not clear what does label 2019 for both purple and orange features mean.
- X-axis does not provide a clear indication what the numbers represent

- The colors are not color-blind friendly, as they use reds and greens. Which are usually the most inaccessible colors for people with color blindness

- The metric thousand thousands is difficult to grasp
- The countries with smaller carbon emissions are almost indistinguishable from each other
